

A Revolutionary New Device

CONSTRUCTOR®

Knotless Adjustable
Button Technology

Unique Locking Design

The Constrictor® fixation system is indicated for the treatment of disruptions to the ankle syndesmosis ligament complex.

The technology provides surgeons the ability to treat syndesmotic injuries using a knotless adjustable button system comprising of UHMWPE suture and low profile titanium button.

BENEFITS

- Superior fixation under cyclic loading
- Physiologic stabilization of the ankle mortise

DUNAMIS[®] MEDICAL[®]

Make the switch to better design
